WHAT ARE THE DIFFERENCES BETWEEN EACH DEVICE?

Each Plasmapen device hasdifferentsettings although the higher the setting, the faster the delivery of plasma energy, allowing the user to work at a faster pace and therefore reducing treatment times. Each device can be used for all treatments although the Plasmapen Ultra and Platinum are more effective for advanced procedures such as lesion removal and using the spray shading technique.

WHAT ARE THE DIFFERENCES BETWEEN EACH COOLJET DEVICE?

The Cooljet Pro device is a slightly larger handpiece with a curved, silicone grip design. Emitting a 30% increase in plasma energy in comparison to the Cooljet Classic device, this will reduce the amount of treatments needed to achieve the required results, rather than the need to reduce already short treatment times.

Cool Jet™
COLD PLASMA

TREATMENT BENEFITS

No Downtime
No Discomfort
No Numbing Required
Immediate Results
Suitable for All Skin Types

Why CoolJet?

- Controls acne
- Treats seborrhoea, eczema, atopic dermatitis, rosacea, and similar conditions
- Minimising inflammation and related blemishes

Our PlasmaPen Platinum device is completely geared towards medical professionals and highly experienced aestheticians with significant, evidence-based, and pre-existing plasma experience. This is the ultimate device in our portfolio and is designed to underpin all the primary treatments and solutions, fully cover all the advanced and niche treatments and also deliver the most high-end, pioneering and next-generation treatments possible with our plasma technology. Foundation Training is included with the purchase of a Platinum device.

COOLJET PRICING

COOLJET DEVICES (‘COLD’ PLASMA) COOLJET CLASSIC
Including training for one student
*Extra training for any additional students can be purchased via the webstore.
UK£ 2500 +VAT
US$ 3500
AUD $ $4800.00

The Louise Walsh CoolJet Cold Plasma device is an advanced, non-invasive skin treatment tool that uses cold atmospheric plasma — ionised gas generated from oxygen and nitrogen at cool temperatures — to gently stimulate the skin without burning or damaging the surface.

COOLJET PRO

UK£ 4000 +VAT
US$ 5500
AUD $ $7800.00

The Louise Walsh CoolJet Pro is the next-generation cold plasma skin-remodelling device, building on the original CoolJet technology with significant performance and design upgrades. It delivers up to 30 % more power than the CoolJet Classic, for deeper stimulation of collagen and elastin and enhanced rejuvenation results. The CoolJet Pro features an improved ergonomic design with a soft silicone handle for greater comfort and control during treatments, plus a redesigned, intuitive device screen that makes settings and monitoring clearer and easier for practitioners.

FUSION PRICING

FUSION 8 UK£
10,000 + VAT
US$ $13500.00
AUD $ $19684.00

Fusion 8 is a revolutionary plasma device engineered for precision, versatility, and safety. Designed to address a wide range of skin concerns, it combines cutting-edge Ozone Plasma and Fusion Argon Plasma Hybrid technology to deliver transformative results with zero risk of PIH—making it safe for all Fitzpatrick skin types.

FUSION GLOW
UK£ 7,500 + VAT
US$ 10,000.00
AUD $ $14229.00

The Fusion Glow is a state-of-the-art plasma device designed to restore, repair, and rejuvenate the skin safely and effectively. Powered by Hybrid Fusion Argon Plasma Technology, this device delivers six dynamic modalities, combining the benefits of Warm Plasma and Cold Atmospheric Plasma to treat a wide range of skin concerns.

FUSION GO
UK£ 5,500 + VAT
US$ 7,500.00
AUD $ $10435.00

Fusion Go is the latest generation model in the Fusion 8 Plasma series — a compact, single-handpiece device engineered to deliver precise warm plasma energy for advanced aesthetic treatments.
